

Pre-Flight Checklist

The 10-minute run-through to do the night before you fly

DOCUMENTS

- ☐ Passport valid 6+ months past return
- ☐ Visa / eTA secured & printed
- ☐ Boarding pass saved offline
- ☐ Hotel address saved offline
- ☐ Copy of passport (photo + cloud)

MONEY

- ☐ Cards told you're travelling
- ☐ Some local cash for arrival
- ☐ Backup card stored separately
- ☐ Travel insurance purchased

CONNECTIVITY

- ☐ eSIM installed (left inactive)
- ☐ Maps downloaded offline
- ☐ Power bank charged (carry-on)
- ☐ Chargers + universal adapter
- ☐ Translation app downloaded

CARRY-ON

- ☐ Liquids in 100ml / 1-quart bag
- ☐ Laptop & tablet easy to reach
- ☐ Medication in original packaging
- ☐ Lithium batteries in carry-on only

Do this the night before — not the morning of.

A calm setup at home beats a panicked repack at the security line.

Page 1 of 2 — the rules cheat-sheet is on the next page.

Security Rules Cheat-Sheet

The rules travelers trip over most — verify the live version before you fly

Liquids — the 100ml rule

Containers max 100ml (3.4oz) each, in one clear ~1-litre bag.

Bag comes out of the carry-on for separate screening.

Medication, baby formula & breast milk are exempt — declare them.

Batteries & power banks

Power banks and spare lithium batteries: carry-on ONLY, never checked.

Common limit 100Wh; 100-160Wh often needs airline approval.

Keep them in your personal item, not the overhead bag if gate-checked.

Electronics

Laptops & large tablets usually come out into a separate tray.

Newer CT scanners may waive this — follow the signs at your lane.

Documents

Many countries require 6+ months passport validity beyond return.

A valid passport or visa does not guarantee entry — officers decide.

Name on booking must match your ID exactly.

At the checkpoint

Empty pockets fully before the body scanner — coins, phone, wallet.

Remove coat/jacket and often belt; slip-on shoes save time.

Pack the liquids bag and laptop where you can grab them fast.
